VITHUSAN VARATHARAJAN

SOFTWARE ENGINEERING | CLOUD | IT SYSTEMS | TECHNICAL SOLUTIONS

Woodbridge / Greater Toronto Area, ON | 416-827-2262 | vithusan25@gmail.com | linkedin.com/in/vithusan-vara/

PROFESSIONAL PROFILE

Technology professional and Software Engineering student with experience spanning software development, cloud-connected systems, enterprise IT support, business applications, networking, technical operations, and solution delivery. Hands-on with Python, Java, C#, JavaScript, SQL, Linux, AWS, APIs, ServiceNow, JIRA, Microsoft 365, and full-stack business systems. Combines software engineering fundamentals with real-world experience supporting users, troubleshooting production issues, gathering requirements, automating workflows, coordinating vendors, and delivering reliable technical solutions.

CORE TECHNICAL SKILLS

Programming	Python • Java • C# • .NET • JavaScript • OOP • Data Structures • Debugging
Cloud & Systems	AWS • Linux/Ubuntu • Windows • TCP/IP • Microsoft 365 • Access Management • SaaS
Data & Web	SQL • Oracle SQL Developer • Relational Modelling • REST/API • JSON • AJAX • HTML/CSS • DOM
Delivery & Support	ServiceNow • JIRA • Confluence • Git/GitHub • Agile • SDLC • L1/L2 Support • ITSM • RCA
Analysis	Requirements • User Stories • Acceptance Criteria • SOPs • Testing • Incident & Change Documentation

PROFESSIONAL EXPERIENCE

Finance & IT Manager - Technology & Digital Platforms

Jun 2022 - Present

Mississauga Chrysler | Mississauga, ON

- Provide L1/L2 support for enterprise applications, workstations, user access, connected hardware, networked systems, and business-critical incidents.
- Gather and document requirements, incidents, change notes, SOPs, user stories, acceptance criteria, and workflow improvements across dealership and lender platforms.
- Troubleshoot application, authentication, data, hardware, and connectivity issues; coordinate users, lenders, software vendors, and technical teams through resolution.
- Identify automation and process-improvement opportunities that strengthen data quality, reduce manual effort, and improve operational continuity.

Solutions Engineer / Founder

Apr 2019 - Present

Securify Inc. | Woodbridge, ON

- Design, deploy, and support cloud-connected video surveillance, access-control, alarm, storage, and networked security solutions for commercial and dealership clients.
- Translate client requirements into technical architectures, device/network configurations, implementation plans, acceptance checks, and operational documentation.
- Troubleshoot applications, IP networks, endpoints, permissions, storage, integrations, and remote-access services; isolate root causes and validate restoration.

Full Stack Software Engineer

Apr 2019 - Jun 2022

Royal York Property Management | Toronto, ON

- Built and supported Zoho CRM automations, ticketing workflows, communications integrations, training tools, accounting integrations, and client-portal functionality across eight departments.
- Supported 250+ users across Windows/Linux, Microsoft 365, Yardi Voyager, RentCafe, Zoho CRM, endpoints, network-connected systems, and enterprise SaaS platforms.
- Translated stakeholder needs into workflows, application enhancements, testing plans, releases, documentation, and production support; contributed to an approximately 50% reduction in downtime.

SOFTWARE ENGINEERING | CLOUD | IT SYSTEMS | TECHNICAL SOLUTIONS

PROFESSIONAL EXPERIENCE - CONTINUED

Network Administrator Intern
Dec 2018 - Mar 2019

J. Walter Thompson | Toronto, ON

- Supported enterprise users, network-connected devices, account/access issues, endpoint troubleshooting, and day-to-day corporate IT operations.
- Assisted with incident resolution, hardware/software support, connectivity troubleshooting, and technical documentation.

Field Service Technician - Fiber Optics Intern
May 2018 - Aug 2018

Bell Technical Solutions | Greater Toronto Area, ON

- Worked hands-on with fibre/copper connectivity, field hardware, installation and testing, fault isolation, customer-site troubleshooting, and service verification.
- Developed practical knowledge of network infrastructure, physical-layer reliability, structured troubleshooting, and customer-facing technical service.

Processing Officer
Sep 2016 - Jan 2018

CIBC | Toronto, ON

- Processed financial-service transactions and records in a regulated environment requiring accuracy, confidentiality, security controls, AML awareness, and audit-ready documentation.
- Managed high-volume work while following defined procedures, escalating exceptions, and protecting sensitive customer information.

EDUCATION & CERTIFICATIONS

CENTENNIAL COLLEGE	AWS CERTIFICATION
Software Engineering Ontario College Diploma Expected April 2027 | Toronto, ON	**AWS Certified Cloud Practitioner** Amazon Web Services Earned November 2025
TORONTO METROPOLITAN UNIVERSITY	**PROFESSIONAL DEVELOPMENT**
Business Technology Management Coursework / academic background Toronto, ON	**Salesforce Certified Platform Administrator** Certification preparation in progress

Relevant coursework: Programming I & II • Software Engineering Fundamentals • Database Concepts • Client-Side Web Development • Web Interface Design • Software Requirements Engineering • Unix/Linux • Discrete Mathematics

SELECTED SOFTWARE & DATA PROJECTS

Academic Software Engineering Portfolio
2026

Centennial College | Toronto, ON

- Built Python and C# applications using classes, inheritance, polymorphism, interfaces, generics, collections, validation, exception handling, and executable test harnesses.
- Developed JavaScript web features using DOM manipulation, events, AJAX, validation, and browser testing; produced requirements, use cases, state models, edge-case analysis, and test evidence.

Relational Database Solution - Oracle SQL
2026

Centennial College | Toronto, ON

- Designed a normalized 12+ table relational schema with primary/foreign keys, integrity constraints, seeded records, an ERD, joins, aggregations, and reusable reporting queries.

DealerList AI - AI-Assisted Dealership Inventory Platform
Current

Independent Product Project | In Development

- Defined MVP requirements for inventory ingestion, authentication, role-based dashboards, sold-vehicle alerts, and human-reviewed AI listing generation.
- Evaluated data models, APIs, security, deployment options, system integrations, and browser-assisted workflows with an emphasis on verification and maintainability.

ADDITIONAL TECHNOLOGY FOCUS

Currently developing: cloud-native backend engineering, Go/Golang fundamentals, Docker, Kubernetes concepts, Kafka/event-streaming concepts, Redis/distributed-store concepts, and distributed-system design.
